

HOW CAN RESEARCH MAKE OUR COMMUNITY BETTER FOR *EVERYONE* ?

Each year, our community invests millions of dollars into local research efforts. This research studies everything from the housing crisis, to education, to transportation, food access, and beyond in Forsyth County and Winston-Salem.

BUT this research often misses the most important piece — *starting with people in community* — to understand our lives, our experiences, and invite us to be co-leaders in how to design the research and best use these resources.

The Peoples' Research Council (PRC) is a new community-led initiative for Forsyth County to put people in charge of local research.

We are building an accepting and inclusive space that respects and affirms all people — all races, ethnicities, ages, genders, sexual orientations, ability or disability, religious affiliation or non-affiliation — all are welcome and valued!
